Hours: 9:00 a.m. to 3:00 p.m., Monday thru Friday

### QUIZ... *The amazing Macintosh computer*

When Steve Jobs, Steve Wozniak and Ronald Wayne started Apple Computers in 1976, their goal was to market the Apple I, which Wozniak built by hand. Certain that the company would fail, Wayne sold his share back to his partners for \$800 and jumped ship. Wonder what he thinks about that decision today?

The Apple I was reborn in 1984, as the Macintosh. It was easy to use and it found immediate success. Since then, Jobs and Wozniak have experienced more than one downturn. But still, nobody disputes the fact that the Macintosh revolutionized personal computing and made it accessible to everybody, and will remain a force to be reckoned with for a long time.

How much do you know about Macintosh? Take the following quiz and find out.

**1. The first Macintosh was produced in 1984, what new feature did it introduce?**
